Dr. Robert Liekfield
Clayton Environmental Consultants, Inc.
25711 Southfield Road
Southfield, MI 48075

Dear Dr. Liekfield:

Per our July 12, 1984, telephone conversation, I have enclosed 14 samples of asbestos on 25 mm cellulose ester membrane filters for analysis by phase contrast microscopy. For each sample please count one hundred fibers or a minimum of 500 fields if fewer than 100 fibers are counted. The sample numbers are listed below. A purchase requisition will be mailed separately.

Sincerely,

Stephen W. Dixon
Section Supervisor -
Industrial Hygiene
