Re: MOU for Vinyl Chloride

Dear Dr. Cibulas:

Thank you for your letter of April 24 indicating that the study plan and protocol for the combined inhalation two-generation reproduction and developmental toxicity study of vinyl chloride in CD rats we submitted on March 22 have been determined to be acceptable by the Agency for Toxic Substances and Disease Registry (ATSDR). Two copies of the signed Memorandum of Understanding (MOU) for the study are enclosed with this letter. I look forward to receiving an executed version of the MOU from you and thereafter to initiating the study.

Please call me at 703/741-5637 if you have any questions or need additional information.

Sincerely,

Hasmukh C. Shah, Ph.D.
Manager, Vinyl Chloride Panel
