From the Factory Inspector's Annual Report for 1938, published in 1943, I have extracted the following figures of deaths from fibrosis of the lung including silicosis and asbestosis.

Disease and Industry	1936	1937	1938	1939
Silicosis:-				
1. Refractories [illegible]				11
2. Pottery, [illegible]				
3. Sandstone quarrying and dressing				
4. Sandstone Mining				
5. Metal Grinding				
6. Sand Blasting				
7. Steel [illegible]				
8. Stone, [illegible]				
9. Slate [illegible]				
10. Enamel and Glaze [illegible]				
11. Millstone Dressing				
12. Slate [illegible]				
13. [illegible]				
14. [illegible]				
15. Slag [illegible]				
16. Granite [illegible]				
17. Tunnel Mining (Rock [illegible])				
18. Coal Mining	190	197	197	197
19. Gold Mining (Rock drills)				
20. Tin mining				
21. Iron ore (haematite) mining				
22. Lead mining				
23. Copper mining				
24. Barytes mining				
25. Mining engineering				
[illegible]				
Asbestosis				
Other Causes of Fibrosis				
[illegible]				

In the annual Report of the Chief Inspector for [illegible] published [illegible]

"Whilst many years ago when the first [illegible] and legislation [illegible] the [illegible] of [illegible] was [illegible] the [illegible] the other hand [illegible] [illegible] to be [illegible] [illegible] that a [illegible] [illegible] [illegible]
