

Gas-fired appliances, 290, 513
 automatic control of, 290, 513
 boilers, 445, 456, 514
 selection factors, 517
 carbon monoxide produced by, 518
 chimneys for, 479
 classification, 513
 control of, 514, 516
 conversion burners, 516, 518
 furnace requirements for, 428, 434
 installation, 518
 rate of gas consumption, 517, 529
 ratings of, 517
 types of space heaters, 515
 used with unit heaters, 246
 warm air furnaces, 514
Gaskets, 634
Glass,
 heat transmitted through, 127, 164
 solar radiation through, 163
Glossary of terms, 787
Grates, 792
 areas of, 182, 418, 436, 449, 454, 792
 of furnaces, 182, 418, 436, 449, 454
 of stokers, 497
Gravity,
 convectors, 533
 heat emission of, 533
 gravity-indirect heating systems, 542
 specific, 3
 steam heating systems, 545
 one-pipe air-vent, 545, 548, 579, 591
 two-pipe air-vent, 549, 580, 591
 warm air heating systems, design of, 411
Greenhouses, temperatures for, 737
Grille, grilles, 792, (*see also Registers*)
 anemometer readings through, 781
 for concealed heaters, 540
 recirculating, 415
 of roof ventilators, 88
 velocity through, 435
 for warm air systems, 415, 431

H

Hartford return connection, 548, 588
Health, effect of air pollution on, 296
Heat, 792
 absorbed by building structure, 151
 air infiltration equivalent of, 140
 capacity, 162, 793
 of leader pipes, 412
 conduction, 789
 consumption, 521
 content,
 of air and water vapor, 12
 of dry air, 22
 of gases, 753
 of saturated water vapor, 23
 convection, 789
 conversion equations, 801
 demand, factors governing, 143
 effects on human body, 58
 electrical equivalents of, 725, 802
 emission,
 of convectors, 533, 540
 by radiation, 708
 of radiators, 533, 540
 equivalent, equivalents, 802
 of air infiltration, 140
 of brake horsepower, 151
 electrical, 725, 802
 exchanger, 223, 224
 shell and tube, 209
 flow meter, 785
 gain,
 from fixtures and machinery, 165
 from outside air, 165
 to be removed, 191
 infiltration equivalent of, 140
 latent, 31
 loss, 76
 of the liquid, 28, 793

Heat (continued)

loss,
 from bare pipe, 669
 computation of, 99, 152, 708, 723
 determination of, 143, 150, 521, 705
 effect of insulation on, 683
 from human body, 76, 705, 707
 by infiltration, 140, 521
 latent, 76
 from piping of gas-fired furnaces, 516
 by radiation, 65, 705
 sensible, 76, 707
 to unheated rooms, 128
 maximum probable demand, 143
 mechanical equivalent of, 794
 produced by cattle, 96
 produced by human body, 57
 pump, 50, 722
 radiation, 795
 regulation in man, 57, 61
 requirements, 522
 sensible, 195, 795
 of air, 12
 loss, 76, 707
 of water, 31
 solar, 160
 sources of, 705, 719
 other than heating plant, 150, 203
 specific, 31
 total, 22, 797
 of saturated steam, 28
 transfer, 99
 coefficients, 100
 transmission, 99, 705
 through air spaces, 101
 through building materials, 101
 calculations, 99
 coefficients, 99, 106
 of ceilings, 121
 combined, 128
 of doors, 127
 of floors, 121
 of glass walls, 127
 of insulation, 107
 of roofs, 124
 of skylights, 127
 of walls, 114
 of windows, 127, 163
 convection equation, 705
 definition of terms used, 100
 effects of solar radiation on, 160
 formulae, 101
 through glass, 126, 163
 measurement of, 785
 in surface coolers, 193
 by surfaces not exposed to the sun, 159
 symbols used in formulae, 100
 tables, 99, 107
 time lag, 162
 utilization, 521
Heaters,
 for domestic hot water, 661
 electric, 716
 capacity of, 725
 radiant, 515, 717
 space, 515
 unit, 237, 718
 wall, 514
Heating (see also Heat)
 district, 299, 687
 effect of radiators, 536
 electrical, 715
 elements, electric, 716
 fundamentals of, 1
 load, 143
 medium, 793
 radiant, 705, 717
 railway air conditioning, 401
 by reversed refrigeration, 50, 722
 surface, 447, 793
 square foot of, 796
 symbols, 804
 systems,
 district, 687
 electrical, 715

Heating (continued)

systems
 fan, 169
 gravity warm air furnace, 411
 hot water, 601
 mechanical warm air furnace, 427
 radiant, 705
 steam, 545
units,
 blow-through, 171
 central fan, 643, 718
 draw-through, 171
 value, fuel oil, 752
 water, 645
Henry and Dalton, law of, 643
Hoods,
 axial velocity formula, 387
 canopy, 389
 for chemical laboratories, 390
 design of, 387
 for exhaust systems, 383
 of furnaces, 429
 open, 389
 suction pressures at, 386
Horsepower, 793
 boiler, 451, 470, 788
 brake,
 heat equivalent of, 151
Hot box, 785
Hot plate, 785
Hot water heating systems, 601, 793
 electric, 720
 forced circulation, 603, 605
 gravity circulation, 613
 installation of, 619
 mechanical circulation, 603
Hot water piping, 601
Hotels,
 stokers suitable for, 502
 temperatures of, in winter, 144
 water supply, 645
Humidification, 10, 217
 atomization for, 222
 effective temperatures for, 82
 methods of, 257
 relative humidities for, 82
 for residences, 437, 538
 systems of, 221
 with water pans, 538
 in winter, 187, 538
Humidifier, humidifiers, 272
 atomizing, 222
 with fan systems, 180
 high-duty, 222
 spray, 222
 types of, 221
Humidistat, 434, 793
Humidity, 8, 82, 793
 absolute, 8, 787
 control, 277
 railway air conditioning, 405
 for industrial processing, 734
 measurement of, 782
 optimum, 72
 relative, 9, 82, 795, (*see also Relative Humidity*)
 A.S.H.V.E. standards, 81
 in comfort zone, 68
 effect on moisture regain, 729
 relation to dew point, 9
 specific, 8, 793
Hygroscopic materials, 728
 moisture content, 727
 processing of, 733
 regain, 727, 728
Hygostat, 793

I

Ice, in air conditioning, 212, 258, 440
Inch of water, 793
Induction motor, 763, 764, 765

Industrial,
 air conditioning, 727
 apparatus for, 221
 classification of problems, 730
 air pollution, 297
 cooling systems, 198
 drying, 326, 729
 electrical heating systems, 722
 exhaust systems, 383
 heat sources, 150
 plants, 727
 processing of hygroscopic materials, 729
 temperatures and humidities for, 734
 unit heaters, 246
Infants, premature, 67, 69
Infiltration, 788
 average, 138
 fuel utilization, 521
 heat equivalent, 140
 through shingles, 133
 through walls, 132
 through windows, 134
Institutions, water supply to, 647
Instruments, 777
Insulation, 793
 asbestos type,
 corrugated, 674, 675
 laminated, 676, 677
 of boilers, 461
 bright metal foil, 104, 105
 building, 724
 characteristics of, 107, 673
 effect on heat loss, 683
 with electrical heating, 715
 heat transmission through, 107, 673
 for low temperatures, 673
 of machinery, 337
 magnesia type, 673
 of piping, 669
 to prevent condensation, 151, 681
 to prevent freezing, 679
 reflective type, 104, 105
 rock wool type, 678
 of sound, 341
 tables, 107, 673
 thickness needed, 682
 underground, 683
 of vibration, 337
Internal combustion engines, 226
Ionization of air, 79
Isobaric, 793
Isothermal, 7, 794

J-K

Joints, expansion, 585, 689
Kata thermometer, 782

L

Latent heat, 31, 794
 loss, 76
 of water vapor, 12
Lead poisoning, 298
Leader pipes, 411
 heat carrying capacity of, 412
 size of, 412, 423
Leakage of air, 131, (*see also Infiltration*)
Length of run, equivalent, 575
Libraries, air conditioning of, 736
Lignite, 484
Liquid, heat of the, 28, 793
Lithium chloride system of adsorption, 200
Load,
 cooling, 157
 design, 451
 heating, 143
 hot water supply, 453
