

DU PONT announces SELF- CLEANING HOUSE PAINT is still available

the paint that cleans itself

1 Starts White—Stays White
Why is Du Pont House Paint so brilliantly white? Because it's made with titanium dioxide, the pigment that's even whiter than snow! This paint stays white, too, because—

It's Self-Cleaning

Du Pont House Paint is so formulated that, as time goes by, a microscopically fine white powder forms on the surface. Heavy rains wash this powder away, taking dust and dirt with it, and leaving the surface clean and white again. (Excessive accumulations of dirt, particularly in sooty industrial communities, or in heavily shaded locations, may delay or interfere with this process.) Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

3 Guards the Surface
Forms a beautiful, durable coating that protects against rust, rot and decay. Available in white and popular tints. When you paint your house, use the paint that gives it both lasting beauty and lasting protection.

Yet this Du Pont Self-Cleaning House Paint costs no more than other good paints. Call in a reliable painting contractor. He'll be glad to use Du Pont House Paint. PER GAL. \$3.35. 16-64L-1078

prevented from selling bottles on a
"per-drink" basis. Some of these
dealers, a spokesman explained, have
adopted the practice of calculating the
number of drinks in a bottle of
whisky and figuring the price of the
bottle on the number of drinks it
contains.
"Another amendment put a curb on
operations of 'finders' and 'buyers'
brokers," who take a commission for
locating a bottle of whisky for a

tellers the opportunity to get a
price premium by taking a "finder's"
commission on their sales.
The amendment is effective May 8.

over and if I petition that room
it will be so small I can't put the
