AIR MAIL

December 7, 1971

Dr. Edward J. Burger, Jr.
Executive Office of the President
Office of Science and Technology
Washington, D. C. 20506

Dear Dr. Burger:

As promised, I am enclosing herewith additional information on Monsanto U.S. domestic production and sales of polychlorinated biphenyls for the period 1963 through 1971.

This information gives a further breakdown of the details which were made public in our press release of November 30, copy of which is also enclosed.

I am not attempting to provide answers to your list of questions in this letter as in many cases we lack the necessary information to provide an accurate answer. As agreed during our recent telephone conversation, the best way to handle this subject would be to arrange a further meeting with members of your group and yourself. I therefore look forward to hearing from you as soon as you are able to establish a convenient date for the meeting either in Washington or St. Louis.

Following our telephone conversation yesterday I spoke to Dr. Sarofim and, at his request, I am sending him a duplicate of this information. I hope this meets with your approval.

Kindest regards,

John Mason, Group Director
Functional Products Groups
