PLAINTIFF'S EXHIBIT IHF 64

February 25, 1948

Dr. Arthur J. Vorwald
The Saranac Laboratory
Saranac Lake, N. Y.

Dear Dr. Vorwald:

Here is a check covering our company's contribution for the current year to the work at the Laboratory. As mentioned to you before, and as you doubtless know, certain sums have been contributed over past years, since you have been carrying on experiments for us and other industries.

I trust there will soon be available to us, for our study, reports covering the experiments which you have already completed on asbestos and diatomaceous earth dusts.

When I was in Pittsburgh last week Mr. McMahon, of the Industrial Hygiene Foundation, spoke to me of this experimental work which you have been doing and asked me when any information would be available. I told him that I did not know just what the present status was.

You mentioned, when here, that the information should be completed sometime in February, on the results of both of these tests. Of course, we realize that the test results will first be submitted to us and other interested parties for review and approval prior to any publication to outside parties.

With very best wishes, I am,

Sincerely yours,

J. P. Woodard

blind copies: V. Brown
Dr. A.J. Lanza
