Ethyl Gasoline Corp.
New York, N. Y.

Gentlemen:

We are having a lot of trouble with one of our employees due to poisoning from Ethyl Gasoline. This employee lost several days recently and is now sick again and on various occasions in the past, has had considerable trouble. The Doctors have pronounced it Ethyl poisoning resulting from Ethyl in the Gasoline.

We have been advised to write you for information regarding the proper method and treatment to prevent future trouble. We cannot discharge the employee, as he is our son and operates our Delaware Water Gap Station and his services are very valuable to us.

Will you kindly reply to our letter giving us the advantage of your wide experience with Ethyl and any suggestions you may have to offer.

Very truly yours,

J. H. Hoelzel
