SUBJECT: Market Information - Commercial Hair Dryers

Background

The following market information has been developed to provide background economic data relating to Special Orders regarding the modification of commercial hair dryers containing asbestos.

Description

Commercial hair dryers are produced specifically for commercial establishments rather than for household use. These articles are described as upright, free-standing (or fixed to chairs), and may employ a "hood" to channel the hot air stream. Such items are designed to become a permanent fixture in hair styling salons and, to a lesser extent, in barber shops.

The following discussion excludes hand-held hair dryers. These items are not easily distinguished from models commonly used in the home, may not be specifically designed for commercial use, and may be offered for sale to the general public.

Production

Data on commercial hair dryers are not separately reported in official Government publications. However, the National Beauty and Barber Manufacturers Association (NBBMA) reported total sales of upright commercial hair dryers in 1978 of \$7 million. About 40,000 such dryers were sold in 1978, at an average price of \$175; this was represented as only a modest increase over estimated 1977 levels. Based on NBBMA figures, there are some 240-320 thousand upright commercial hair dryers currently in use, assuming a 6 to 8 year expected life.

Conair Corporation, Edison, New Jersey, is reported to be the largest domestic producer of upright commercial hair dryers. A number of other firms also produce these articles, but their individual market shares appear to be small; many such firms may operate nationwide on a limited scale, or may concentrate on specific regional or metropolitan markets.

Data on U.S. imports of commercial hair dryers are not available; however, the amount of such imports is believed to be small according to a spokesman from the U.S. International Trade Commission.

Distribution

Supplies and equipment for use in commercial hair salons and barber shops reach their consumers through a network of distributor-wholesalers; these wholesalers are not brand-aligned, and may sell a variety of products from several manufacturers' lines. Individual product choices are frequently made by wholesalers at industry-sponsored trade shows. These distributor-wholesalers rarely receive exclusive territorial rights or restrictions from the manufacturers.

Based on NBBMA figures, there are approximately 8,000 beauty and barber supply wholesaler salespeople in the U.S. One commercial hair dryer manufacturer put the number of nationwide wholesalers at 1,800. The number of wholesalers which engage in the sale of "hardgoods", such as upright commercial hair dryers, is expected to approximate the latter figure.

Consumers

Upright commercial hair dryers are usually purchased from the wholesaler by the individual shop; these items do not enter the retail market. The shop owner has control over this equipment, intended for use by the stylists. However, small numbers of these hair dryers may find their way into private households due to shop closings and the consequent liquidation of shop assets.

From 1972 to 1978, the number of consuming establishments decreased by 5 percent (see enclosed table). However, over this period a trend toward larger, multi-operator shops has developed, an assumption somewhat supported by the rapid increase in employees and gross receipts. Further, the establishments are concentrating in metropolitan areas in an attempt to increase the number of clientele. As salon staffs increase, a greater number of dryers per establishment becomes necessary. Although hand-held dryers may account for the bulk of salon usage, upright models are also required for permanent wave styling and other special styles and allow for increased productivity, since stylists are able to accommodate other customers during the drying process. Therefore, the demand for these items appears to have remained strong.

The current number of principal users (stylists) of upright commercial hair dryers could approach 886,000. Less frequent exposure to this product would be encountered by each customer in salons where such hair dryers are used.

Revlon - Realistic Professional Products Division 3274 Beekman St. Cincinnati, OH 45223 Revlon 767 Fifth Ave. New York, NY 10022 (212) 572-5000	Siesta I, II & III model dryers According to the company these three models have asbestos insulated electrical wires. The wires have a felted asbestos layer, covered by a fiberglass overbraid impregnated with silicone resin and, therefore, the asbestos was not exposed to the air stream. These models were manufactured until late 1971. Ultra Comfort model, which was produced until mid-1979, contained an asbestos string which was exposed to the air flow. The model also used asbestos insulated wires like those used in the Siesta models until late 1971.

COMPANY ACTIONS AND POLICY

Revlon informs the Commission that all models are professional use only and that there is no asbestos in current production.

In older models, asbestos on electrical wires, not on areas connected with air stream.

COMPANY ACTIONS AND POLICY**MODELS WITHOUT ASBESTOS**

Has instructed those firms who manufacture dryers for Wards to cease the use of asbestos in new production.

Asbestos paper is being removed from present stock.

Posting signs informing customers of the asbestos controversy.

Company will offer a new dryer currently in stock in exchange for dryers brought back by consumers. If the consumer does not want to accept the "exchange item," each store is advised to "adjust on a policy basis."

Private Label wall-mounted electric hair dryers under name Moore-Dri.

No asbestos is used or has been used in their dryers.

Presto ceased selling hand-held portable electric hair dryers in 1976. None of these portable hand-held electric hair dryers contained any asbestos materials.

COMPANY ACTIONS AND POLICY**MODELS WITHOUT ASBESTOS**

In response to the question "Have asbestos materials been used in dryers your firm has manufactured, imported, or labeled within the last ten years?" Paris Associates by Mr. Jerry Zipperman responded NO.

We do not manufacture or sell portable hand-held electric hair dryers. We sell dryers manufactured for us. Our manufacturer claims there is no asbestos in his dryers.

Sales of all hair dryers that may contain asbestos have been stopped.

The company is following its normal policy of customer satisfaction. If the customer is concerned, the company will repair, replace, or refund depending on the dryer.

Approximately 47 models do not contain asbestos.

COMPANY ACTIONS AND POLICY

MODELS WITHOUT ASBESTOS

Faberge, through it's Rayette Division, manufactured and private labeled portable, electric, hard-hat hair dryers until April, 1969. Rayette-Faberge has since sold it's hair dryer business to Dynamics Corp. of America. Some of the models manufactured more than ten years ago contained an asbestos heater gasket, parts of which are exposed to the air flow. The color-coated heater lead wires used in some models contained asbestos insulation. Parts of the heater lead wires are exposed to the air flow.

Unknown

Is a private labeler. Its supplier has said that its products do not contain asbestos, according to the Company.

Unknown

A Commission staff survey indicates that some distributors have taken back Solanotronic and Solano models containing asbestos for removal and replacement of the asbestos liner with mica.

COMPANY ACTIONS AND POLICY**MODELS WITHOUT ASBESTOS**

For the asbestos containing dryers, model numbers IID 300E, IID 2300 and IID 2300P, Sanyo is offering as a replacement, the model IID 2210.

Replacements are available at the company's service departments in New Jersey.

Postage reimbursement is provided for mail-in's if consumers request it.

Save-Way will repair hair dryers containing asbestos by removing the asbestos in the dryers' nozzle

Dryers are to be sent to the firm's Hialeah, Florida address.

Consumers will be reimbursed for postage on mail-ins if the consumer requests it.

Save-Way is also offering a new replacement dryer at the cost of \$9.95 with the same postage reimbursement policy.

The replacement dryer will not be sent unless the consumer specifically requests it and understands there is a charge for the replacement.

Consumers returning dryers should include a note indicating whether the dryer is being returned for "asbestos repair" or for dryer replacement (for \$9.95 cost).

Dry Baby 1200 – white with orange lettering or any color other than white with black stripe.

ALL OTHERS – except those listed specifically as having asbestos.

Boss Turbo 1200 (White and Tortoise models)

COMPANY ACTIONS AND POLICY

MODELS WITHOUT ASBESTOS

Company will replace their models containing asbestos with new models at consumer request, either by mail or at 450 authorized centers.

Consumers can mail dryers that contain asbestos to

Schick, Inc.

216 Greenfield Rd.

Lancaster, PA 17601

for replacement.

Current design contains no asbestos but models are not yet identified.

Previously sold models without asbestos are not yet identified.

PD-1001

Shipments suspended March 29, 1979.

The company will replace units which contain asbestos that are mailed to firm or repair them at its option.

COMPANY ACTIONS AND POLICY

MODELS WITHOUT ASBESTOS

Company does not now purchase for sale hair dryers made with asbestos. All 14 models with asbestos heat shields have been removed from store shelves and sales halted. Normal consumer policy applies: "Satisfaction guaranteed or money back."

Sears will replace the unit or refund the purchase price.

Sears has removed from sale all of its hair dryers which contained asbestos, has retrofitted them with mica, and only then returned them to the sales floor.

These retrofitted dryers are functionally identical and the stock numbers are the same EXCEPT that an "M" has been added to all units reworked to contain mica

All models not identified on this list as containing asbestos.
