SUBJ: ATTACHED NOTE

VISTA

THH, JAD, and I have discussed the attached note. Our response is below per the numbered questions.

1. We can have our 1988 SARA 313 emission numbers collected and compared to our last years numbers, and some explanation as to the reasons for significant decreases.
2. It will not be possible by July 20 to have industry comparison numbers in any complete or meaningful way. This is difficult to do in a way that doesn't have to be "qualified" when presented. We should discuss this further if you want to at a later date.
3. JAD and THH can prepare a presentation on the waste minimization "game plan" but this would not include numbers or percentage reduction targets. This quantatative information won't be developed by July.

Item 1 and 2 could be presented in 15 minutes.

To TGG, THH, MAD → RDX Date

Can we have, by the
July 20 Board Mtg,
a presentation ready
demonstrating

Yes } 1) Our drop in reported
JCL } DATA IN numbers and
will do } why? } 15

(NO) 2) How do we compare against
the comp

game
plan - but
not #5 } 3) Our ~~to~~ 1984 → ? waste
immigration game
plan?
