Enclosures

Memo re Busey Documents received from Sweeney under cover letter dated 9/19/00

EPL 303-001 Folder 1 "IBT Mice Inventories"

EPL 1-14: This is a collection of spreadsheet information on the 1600 mice in the study at IBT; On the left hand column are the organs and areas of the mice bodies of interest; On the top are the mice study numbers (appear to be 1600 mice studied); the data is entered into the cells by letters "S", "B", and "W"

EPL 21-43: Same type of spreadsheet, but there are tallies along the y-axis for the organs with heart (64), kidneys (69), liver (70), lung (70) and spleen (68); along the x-axis are small numbers with "pm" written below them – could this be a measurement of the parts per million each animal was exposed to? Also along the x-axis are "X"s placed through both of these rows with large question marks above them – could this be to indicate death?

EPL 44-53: Same with additional notation of male and female symbols

EPL 54-83: Slightly different spreadsheet; separated the Test Groups into C, T-1, T-2, T-3 and T-4; Same organs down the y-axis and animal no. along the x-axis; have a totals column all the way to the left; dated in March of '78

EPL 84-93: Same spreadsheet info

EPL 303-001 Folder 2 "IBT Rat Inventories"

EPL 103-142: Slightly different spreadsheet like one at EPL 54
