

PURE LEAD-IN-OIL

... IN
*time-saving
form*

Dutch Boy soft paste white-lead has easy-breaking qualities—gives pure lead paint... quick

PAINTERS and other buyers of white-lead are turning more and more to the use of this easy-to-thin lead-in-oil.

With Dutch Boy soft paste white-lead, "breaking-up" is greatly speeded. Soft paste can be brought to brushing consistency at the rate of a gallon of paint a minute.

Dutch Boy soft paste is pure white-lead and pure linseed oil, differing from regular or heavy paste lead only in that it contains a higher percentage of oil. It is this extra oil, ground in at the factory, that gives

soft paste its easy-breaking qualities.

The user of Dutch Boy soft paste white-lead saves time and labor in mixing pure lead paint. This more convenient form of lead-in-oil also tints easily. And it produces a smooth paint that spreads in a superior manner... a pure white-lead paint, the standard for generations.

DUTCH BOY SOLDER

Another Dutch Boy product is solder. There is a Dutch Boy solder for every purpose, the tin including wire-rope, wire, tin, cut and lead core solder. Write for complete information.

Dutch Boy soft paste white-lead is the only strictly pure lead-in-oil always sold under the Dutch Boy trademark. It simply contains a higher percentage of linseed oil than the regular grinding.

Dutch Boy soft paste white-lead is sold by the pound in 100 lb. steel kegs and in 50, 25, and 12 1/2 lb. steel pails.
