14:40:35:09 1968.

14:40:35:19 A That was the first article that was ever

14:40:37:28 printed that I ever saw, and I guess that's the

14:40:40:09 one that I remember.

14:40:40:21 Q And do you remember that the Dr. Lynch

14:40:43:00 was studying whether asbestos from brakes polluted

14:40:50:10 the atmosphere?

14:40:52:09 A I don't remember the study. I just

14:40:54:03 remember his name for some reason. He was with --

14:40:55:28 I knew he was from Harvard, that's about it.

14:40:58:22 Q I didn't want the record to think that

14:41:01:01 you were saying that you remembered him studying

14:41:03:22 people who were working with brakes, because you

14:41:06:28 don't remember that; correct?

14:41:08:01 A No, I do not. Did I say that?

14:41:10:27 Q I'm not sure exactly how that came out.

14:41:16:22 And the reason that Dr. Lynch was studying whether

14:41:23:24 asbestos was emitted from brakes into the

14:41:28:16 atmosphere is that the friction materials industry

14:41:30:18 used thousands of tons of asbestos every year, and

14:41:34:09 there was a real concern that when people would

14:41:37:25 apply their brakes that asbestos would get up into

14:41:40:21 the atmosphere and we would all be exposed;

14:41:43:27 correct?
