DHS-OH-C

March 7, 1956

Mr. F. L. Shepherd
Manager, Sales Engineering
Gilbert and Barker Manufacturing
Company
West Springfield, Massachusetts

Dear Mr. Shopherd:

Your letter of March 1 addressed to the Surgeon General of the Public Health Service has been referred to me for reply. You request an opinion on a change that you contemplate adopting in the size of a warning sign for pumps dispensing tetraethyl lead gasoline.

The proposed change, in my opinion, would result in a sign with dimensions that would remain in agreement with those published in the regulations carried by an article entitled "Changes in Regulations Pertaining to Tetraethyl Lead Gasoline" (Public Health Reports, October 11, 1946, page 1458).

I hope that this information will serve the purposes you have in mind.

Sincerely yours,

Henry W. Boyle
Chief, Occupational Health Program
