Re: Eugene Butler
Our File #5964

Dear Barry:

As I mentioned to you a few weeks ago, I would like to retain your services to investigate what, if any, documentation exists relative to Combustion Engineering's knowledge of the health hazards attendant to exposure to asbestos from the period of 1940 to the present. You had mentioned to me that you had already done a search of some documentation to this end and, as you will recall, I mentioned that one of my associates had identified some other documentation. I am attaching a list of items which he identified at the Library of Congress and ask you to compare to your previous search efforts. Please exclude number 15 on the list as it applies to another matter.

Please give me a call when you have had an opportunity to review the list so we can determine what, if any, action you would be able to take on our behalf. I hope all is going well.

Yours truly,

MARTZELL, THOMAS & BICKFORD

Scott R. Bickford
