RE: NESHAPS Notification Of
Asbestos Removal
Du Pont, Victoria County, Texas

Dear Mr. Stewart:

E. I. Du Pont De Nemours & Co. (Inc.), the owner, whose address is P. O. Box 2626, Victoria, Texas 77901, plans to remove approximately 450 square feet of asbestos-containing insulation from a large heat exchanger that is about 25 years old.

The heat exchanger is located on the Du Pont Victoria Plant site which is about ten miles south of Victoria, Texas, near State Highway 185. Work which involves asbestos is expected to start on January 30, 1981, and to be completed within 20 days thereafter.

The removal job will be supervised by Du Pont personnel to insure that proper safeguards, work practices, and disposal procedures are followed. All asbestos will be "wetted" before handling. Respiratory protection will be worn as required. Proper hygiene and protective clothing will be worn. Caution signs will be appropriately placed to alert workers to the presence of asbestos and that necessary precautions must be taken to enter the area.

All asbestos will be disposed of on the Du Pont Victoria Plant in a disposal area registered by the Texas Department of Water Resources (Solid Waste Registration 30079) in a Class I (hazardous) pit. All asbestos will be placed in sealed plastic bags at the point of removal and kept sealed during movement

DUP 0821266

DU 011681

and disposal on site. Following disposal, the material will be covered with a layer of clay to eliminate the potential for later exposures.

Please contact me at (512) 573-5111 Ext. 1277 if there are any questions.

Very Truly Yours,

Andy Nickolaus
