Memo

Subject: Safety Meeting for February, 1988

Gene Gray with Vallen presented a program on Five Minutes Escape Pak, when and how to use them. The escape paks are not to be used to work in. They are self-contained breathing apparatuses for escape only from environments immediately dangerous to life or health. We discussed the Half- and Full-Facepiece, Twin-Cartridge Respirator. These respirators are to be worn when working on a low concentrated area only.

We discussed the chemicals that are to be used in each unit and the personal protective equipment that will be worn while working in units.

When working in the yellow- and black-chain areas, the employees must work in "two man" teams.

Safety glasses must be worn at all times upon entering the plant.
