30 East 42nd Street,
New York 17, N. Y.

Attention Mr. E. H. Merthe,
Division Manager of Purchases

NO. 9 BOILER - INSTITUTE PLANT

Gentlemen:

Please refer to your letter to us of October 2nd, 1951, our quotation letter to you of October 3rd, 1951, and your letter of intent to us of October 9th, 1951. We are handing you six copies each of the following:

- A. Proposal No. 9613 with drawing LP-7854A.
- B. Proposal No. 9613-A with our drawing LP-7854.

"A" is based on a duplication of No. 8 unit with the exception of the following:

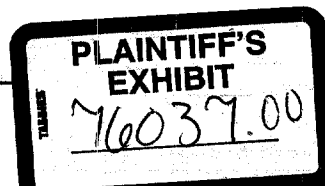

1. Our newer type pulverizers - No. 50 series.
2. Different type safety valves - Foster instead of Crosby.
3. Our newer condenser type steam purifier.

The addendum sheet included with "A" lists the extras, exclusive of our single header hopper bottom type of construction, which extras are requested in your letter of October 2nd, 1951.

"B" covers the extra equipment in the main body of the proposal, not as an addendum, and also includes the single header hopper bottom type of construction.

In our quotation letter to you of October 3rd, 1951, we named the figure of \$283,422.00 delivered and erected, with adjustments, for a duplication. This price was made on the basis of our proposal No. 3203 dated March 29th, 1944, our contract B-1586. We have just discovered that all the material in B-1586, being a D. P. O. project, was shipped collect, freight not included. This procedure is extremely unusual and being so rare we inadvertently did not include the freight and unloading item in our quoted price to you of October 3rd. This amounts to \$4,520.00 and, therefore, the figure of \$283,422.00 should have read \$287,942.00. We are sorry for this oversight but know that you will understand this explanation. Therefore, the price of the equipment furnished by us, delivered and erected, (proposal 9613) is \$287,942.00. Terms of payment per final page sheet 1 of 5, and subject to adjustments as follows:
