College of Medicine,
Cincinnati, Ohio.

Gentlemen:

Some time ago one of your men, Dr. Schradin, examined a patient of mine by the name of [REDACTED] who resides at 3771 West 130th Street, Cleveland, Ohio.

At the time Dr. Schradin examined this man there was some question whether this was a case of lead poisoning. The man since then has returned to work and has handled Ethyl Gasoline for three months and symptoms have re-appeared, and he is again unable to work.

Dr. Schradin asked me to notify him if patient returned to work and if symptoms re-appear so that he might forward containers for examination of the urine and stool. Would you kindly forward these to patient so that we can determine whether there is any lead present. Thanking you for your kind attention, I am,

Very truly yours,

EFK/MB

Edw. F. Kotershall M.D.
