Salem, Virginia

Attention: Mr. A. E. Coulter

Drawing 194-A-6980
Order BC-224151

Gentlemen:

We acknowledge receipt of your letter of December 6th approving the samples submitted to the above drawing for Revision Number 2 (106° arc).

We also acknowledge receipt of your Order 068EM-203602 covering the drill jig charge for your revised Blue-print 194-A-6980, Revision 3.

We have placed the order for the drill jig to the new drawing which has a shorter arc (80°). We have changed your drawing to show that the tolerance on the radius of this part is plus or minus 1/8 instead plus .200 minus .000. It is our understanding that this is satisfactory as per our recent conversation with Mr. J. Cannon. We further ~~understand that new drawings will be submitted shortly covering this change.~~ We will not hold production of the drill jig.

Will you please advise whether or not you require new samples from the revised drawing before we proceed with production with the open orders.

Very truly yours,

W. C. Campbell
Special Representative
