

the lighter spring wood bands of the lumber.

Inadequate priming often leads to such defects. Properly applied dense primers with a sufficient number of paint coats will entirely prevent such spotting.

and for February alone were nearly half again his 715 and \$48,384 figures for the same periods. Harry G. H. Construction Committee reported.

PROTECT YOUR VEGETABLE ROOTS FROM NEMATODES

Tomato root strangled by nematode galls. Pest attacks over 1500 kinds of plants

Apply **D-D** before you plant

Want a finer vegetable garden this summer? Kill the tiny, destructive nematodes, wireworms and other parasites in your soil. Apply D-D Soil Fumigant 2 weeks before you plant. See how your plants and

young trees increase their growth when free from root pests. Economical . . . easy to apply. To avoid infesting soil, ask for D-D protected plants at your nursery or garden supply store.
