

MONSANTO CHEMICAL COMPANY **REC TO**
Anniston, Ala.

DATE August 7, 1945

TO St. Louis

REFERENCE

ATTENTION Mr. W. E. Ault

SUBJECT Resistivity on Arcelors

We would like to know if you have a standard solution, as indicated in the General Electric Company methods of analysis on Resistivity and Power Factor Tests on Oils and Pyranols. G.E. refers to the oil as standard #5314.

If you have no information on this oil please advise the method the St. Louis plant has been using to check the instrument and cells employed in this measurement.
