Dear Dr. Johnson:

Thank you for your call last week. I have discussed the proposed study of former employees of Pittsburg Corning Corporation with our Clinical Director, Dr. Jack Miller, and with Dr. John Chapman, Professor of Medicine at the University of Texas Southwestern Medical School. Since Dr. Miller would be involved in any project that is initiated at our institution, I am sending you his curriculum vitae. I would like for him to accompany me at this meeting in Washington if we can find funds to pay his way and if this is agreeable with you. I would suggest that Dr. John Chapman be contacted if you feel it is desirable to involve someone at the medical school in Dallas.

If you have any preliminary thoughts on what the project would involve, I would appreciate hearing from you. I will be doing some reading on the subject.

Sincerely,

A handwritten signature in cursive script, appearing to read "George".
