St. Louis, Mo.

cc: Messrs.
D. Danna
W. R. Eberhardt
N. T. Johnson
D. A. Olson
W. B. Papageorge

Dear Howard:

Thanks for your prompt answer. I will be expecting to hear from Bill Papageorge on questions which I raised in my recent memo.

This will confirm that MMK is not concerned with the Pydraul fluids which relate to the Monsanto/McDonnell-Douglas agreement, such as Pydraul F-9, 625 and AC. However, the other Pydraul products of more general industrial interest can be of primary concern. MMK's market evaluation is rather borderline in volume and our justification for manufacturing is somewhat critical if the shift is entirely to phosphate ester based Pydraul. Our firm evaluation will depend on formulations which are still dependent on Monsanto research programs. Hence, we shall have to wait before reaching a conclusion on Pydraul manufacture.
