Subject: [SPAM] Project submission

Dear sir/madam

Am Ssenoni Nicholas from Uganda and I came across this program of yours, about environmental protection projects. I am an Environmental Engineer by profession with now a 4 years working experience in the field of industrial manufacture ring however over time I have found challenge in the field especially issues to do with waste water management.

this is quite a very expensive issue to deal with by many upcoming industries since the country is just starting to get industrialized and you find many of them who can not afford the expensive technology just discharge off this Wastewater directly. I therefore thought of a research on what best can be done, that is cheap and effective to handle this problem. I came up with a research of using earth worms as a cheap way to naturally treat this effluent, however over time I have failed to get support on the topic, therefore my humble request is can it be possible for me to submit this research proposal of mine as a project and you support me prove it. Hope to hear from you very soon.

Thank you
Nicholas.
