

Famous Pittsburgh firm

uses

Refrigeration

35 years, and finds it very dependable

The D. L. Clark Company, manufacturers of the world famous Clark Bar, and Clark Brothers Chewing Gum Company now operate eight large Frick refrigerating machines in their Pittsburgh Plants. The first of these compressors, installed in 1918, is still in service. Other Frick equipment includes condensers, coolers and controls.

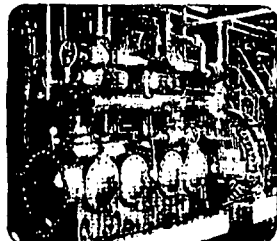

Today, Clark Bars and Clark's Teaberry Gum are famous the world over. Frick air conditioning and cold storage systems play a vital part in maintaining the quality of all Clark products.

There's hardly a business that cannot profit from the use of similar Frick cooling equipment.

Let us quote on the system YOU need.

"LADDER RISK"

with...
Babbitt
Adjustable
SPROCKET RIM
with Chain Guide

Overhead valves, whatever their position, are always within reach — when you control them right from the floor! No need for climbing ladders, perching on beams, belching on workbenches or machines. Avoid accidents — and easily clean. Note these particular advantages of Babbitt Adjustable Sprocket Rim with Chain Guide:

- Positive, efficient valve control
- Saves money on fuel and steam
- Does away with accidents

Four simple, quickly assembled parts, easily installed — in range of 10 adjustable sizes to fit all valve wheels from 2 to 30 inches diameter with rising or non-rising stems.

Call your Industrial Distributor. He carries complete stocks. Or write for descriptive folder and prices.
