JUSTIFICATION

TITLE: Natural Gas Odorizer

DESCRIPTION OF EXPENDITURE

This project contemplates the expenditure of $1700 for purchase and installation of a wick type odorizing unit for natural gas to the office/laboratory area. A mercaptan type odorant will be added to natural gas to the cafeteria kitchen, Research 1 and 2 buildings, Monomers Control Laboratory building and the Fire Dept. Station House, all of which are served by a single 2" distribution line.

STATEMENT OF PROBLEM AND NEED FOR CAPITAL EXPENDITURE

We do not now odorize natural gas anywhere in the plant, although at one time gas to the cafeteria kitchen was odorized for awhile. The use of unodorized natural gas in enclosed spaces constitutes an obvious hazard that is well understood. This is not an acceptable hazard for the general public and state law requires that only odorized gas be delivered to customers of gas utility companies. Obviously, we are exposing some of our people to this same hazard that is unacceptable for the public. This project proposes to correct this situation for the office/laboratory area. PT Management concurs that natural gas to their labs should be odorized.

ALTERNATE COURSES

There is no practical alternate to this proposal other than to do nothing and continue to accept the risk of using unodorized gas in these buildings.

ESTIMATED SAVINGS

This is a safety project and is thus a non-earnings investment.

J. B. Cook

10/24/75

PEERLESS ODORIZER
WICK TYPE

For small tap lines and schools.

Installed in the gas line as a unit.

Two needle valves with dial hand wheels serve as both shut-off and control valves.

Both control valves turned to same setting. (approximately 1 turn)

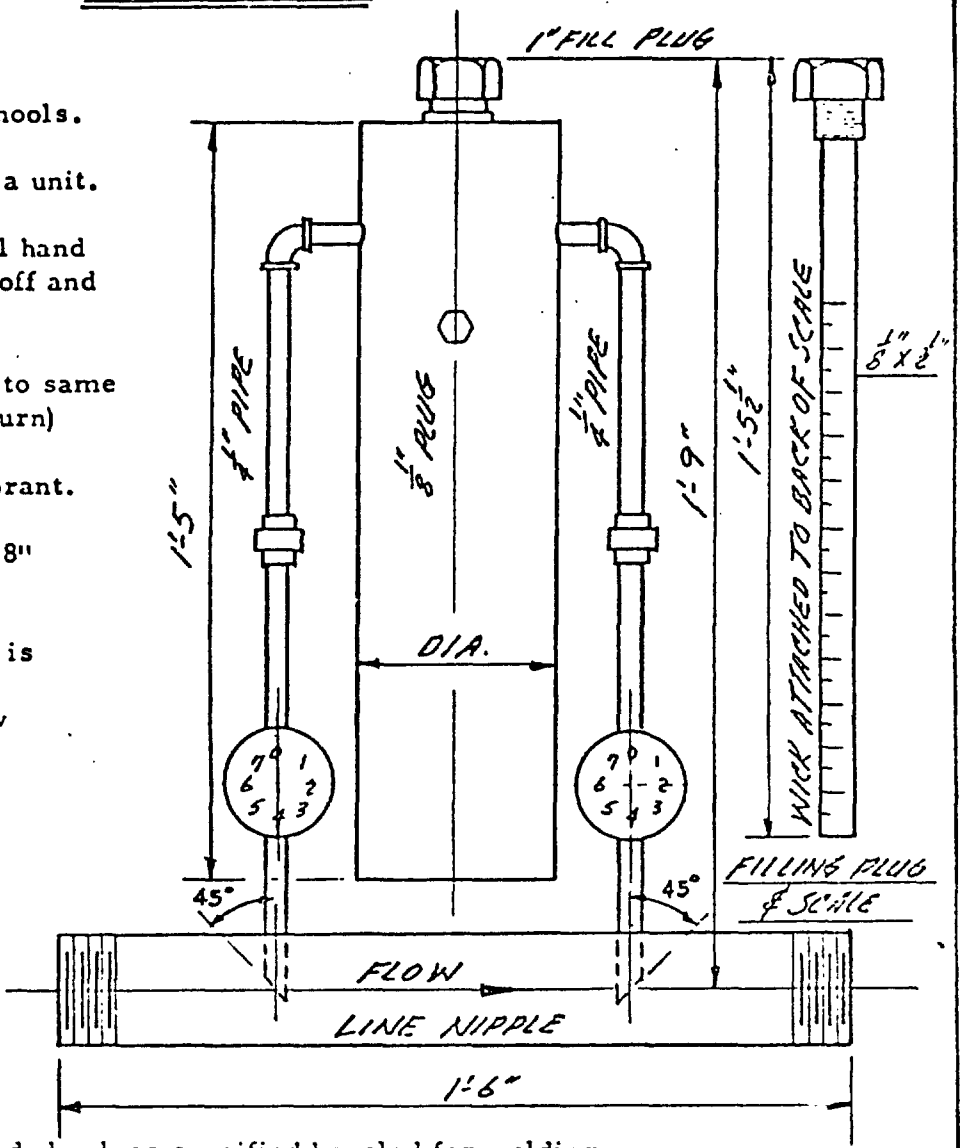

Suitable for any type of odorant.

Storage Tank is filled to 1/8" opening.

Attached to 1" Filling Plug is scale in gallons showing odorant used below 1/8" opening.

Wick is attached to back of scale.

Design Pressure 1200#.

Line Nipple furnished threaded unless specified beveled for welding.
