Industrial Health Survey
Your letter Sept. 22, 1947

We here at Manville are very well satisfied with the way the survey was conducted at our Manville Plant and the careful manner in which the records were prepared for our Industrial Health Program.

Governed by the findings of your Mr. Petrick and Mr. Dieringer, we are carrying on a program of improvement and expect from time to time to call upon your offices for recheck surveys of improved areas.

Very truly yours,

Benj. F. Stanton
Safety Engineer
