Dr. Robert A. Kehoe
Director, Kettering Laboratory
of Applied Physiology
Cincinnati, Ohio

Dear Dr. Kehoe:

I have just read your interesting letter of June 10th in reply to mine of the 4th pertaining to tin-lined lead collapsible tubes. The information which you have given us is of great help and we particularly appreciate your kind offer to be of further assistance in the preliminary studies of this problem. We have received only a limited quantity of these new tubes and, therefore, have not had the opportunity to test, as yet, very many of the products which we offer in collapsible tubes.

Thanking you again and with kindest personal regards, I remain

Sincerely

E. Ger
Director of Laboratories
