

On the paint scaffold for generations

YOU can be sure of a good day's work with Dutch Boy on your scaffold. It is the white-lead that has been used by generations of good painters and still is the choice of all skilled craftsmen.

This pure white-lead makes a paint that spreads easily under the brush. It brushes out smoothly and uniformly. It results in the kind of job that painters are proud of.

With paint made of Dutch Boy white-lead, any desirable tint can be secured. It enables painters to offer property-owners really distinctive color combinations.

If at any time you are in doubt as to how to obtain a certain tint or desire information about any other phase of painting, such as proper mixing directions, formulas for various kinds of work, etc., write us to help you out. We are always glad to be of service in this way.
