Thank you for the kind introduction.

Ryan, nice to meet you. We definitely have a lot to talk about and I can gladly help to plan Administrator Pruitt's trip to Mexico.

Let me know what day works for you and we could meet for coffee, lunch or whatever you prefer.

I look forward to working with you.

Best,

Hector Castro

Much appreciated for the introductions. I know Administrator Pruitt is eager to meet with his counterpart in person and other Mexican officials. He is actually considering a trip to Mexico City soon to start to accomplish that. I would really like to work together on that planning. Thanks.

Importance: Low

Ryan,

Thanks again for meeting me for this morning. I appreciate you taking time out of your packed schedule to visit.

I also wanted to use this opportunity to introduce you to Hector Vizcarra. Hector is the Minister/Representative of SENER at the Embassy of Mexico. Hector and I recently spoke about the impact of the domestic oil and gas sector and its impact on the bilateral relationship and during that visit he expressed an interest in meeting you. I also know that you are interested in engaging more with your counterparts in Mexico and know that Hector is a wonderful contact for any questions or information you may need. It is my hope that you two might be able to sit down and meet soon.

I look forward to seeing you again soon,

JW
