Mr. Paul Brauck
Ralston Purina Company
Checkerboard Square
St. Louis, Missouri 63188

Dear Mr. Brauck:

Confirming your October 6, 1972 phone call, enclosed are 100 pre-addressed return labels. Each site returning drums of fluid should clearly indicate the drum contents on each label.

As we discussed, we would appreciate each of your plant sites notifying us before their returning fluid so that we can issue the site a "fluid return identification number." This identification number should appear on the freight bill of lading and on each drum. The drums can then be shipped freight prepaid to:

Monsanto Company
Dept. 246
Sauget, Illinois 62201

It is my understanding that all returns of Pydraul ACA, 135A, 150A and 312A will be shipped freight prepaid and that we will properly dispose of the fluids by high temperature incineration.

Please note that we cannot handle aqueous solutions or solids (i.e. sawdust, rags or sludge). For these materials, we suggest you check local authorities and your own environmental department for an approved method of disposal. Our Sauget plant is instructed to refuse receipt of containers containing solids, and to return same to the sender at the sender's expense.

On drums of Pydraul ACA, 135A, 150A and 312A which have the original Monsanto bung seals intact and shipped freight prepaid to our Sauget incinerator, we will issue credit, at the original purchase price, to the returning site. On drums returned for credit, we would appreciate the words "RETURN FOR CREDIT" being stenciled on each drum.

Thank you for your cooperation. Please feel free to contact me at (314) 694-2500 if you have any additional questions.

Sincerely,

Paul W. Gann
Project Coordinator
Heat Transfer Fluids
