CEMENT ASBESTOS PRODUCTS COMPANY

Ragland, Alabama

TO: Jerry Jones

March 26, 1975

FROM: Jim Carpenter

SUBJECT: Excessive Asbestos Levels

Samples taken on our last survey indicate that your work area contains asbestos fibers in excess of limits established by the Federal Register, Section 1910.93a.

Adequate dust controls will be engineered wherever possible. But, until such controls can be established in your area, you should wear the respirator we have provided for you while in the area of the fiber charger.

To acknowledge your receipt of this memo, please sign and date it below in the space provided.

Sincerely,

Jim Carpenter
Plant Manager

JRC/cc
