Gerry Portis
Vice President
Midland Manufacturing Corp.
7733 Gross Point Road
Skokie, IL 60077

Dear Mr. Portis:

Attached is the latest version of the script for the video being produced by the Chemical Manufacturers Association (CMA) Vinyl Chloride Transportation Committee. The video, entitled "Guidance for Mitigating Leaks and Installing an Emergency Capping Kit on VCM Tank Cars" is intended to be used in the training of emergency personnel who may have to respond to an incident involving a leaking tank car containing vinyl chloride monomer. Since the application of Midland's Capping Kit is an important component of the video, members of the Vinyl Chloride Transportation Committee would appreciate your reviewing the script. In particular, they would benefit from your review and comment on the accuracy of the information pertaining to the kit.

CMA is planning to begin production of the video within the next two weeks, so your prompt attention to this matter would be appreciated. If you have any questions, please feel free to contact me at 703/741-5639. My fax number is 703/741-6091.

Sincerely,

Wendy K. Sherman
Manager,
Vinyl Chloride Transportation Committee
