Dr. R. A. Kehoe
Ethyl Gasoline Corporation
Cincinnati, Ohio

My dear Dr. Kehoe:

When I saw Mr. Lewis day before yesterday, he talked to me about the problem of a hose mask becoming saturated with ethyl gasoline, and of the recent tests which you have made on a section of our hose.

I had planned to see you this coming week, but I find my plans changed so that I will be unable to make Cincinnati.

Would you be good enough to send me a short section of our hose? I would like to have it very carefully examined here.

Regretting my inability to stop in to see you personally, I am

Cordially,

F. R. Davis
