

You're invited to
commemorate the
Start of Operations at
Sila Moses Lake.

Save the Date

Sept 23, 2025
10:00 am - 1:00 pm

3741 Rd N NE
Moses Lake, WA 98837

More than a decade ago, Sila pioneered the silicon anode, which is now at the forefront of the biggest shift in battery technology since the debut of the lithium-ion battery. Today, we're proud to lead in a powerful convergence of American innovation coming to life through American manufacturing.

Sila is thrilled to invite you to celebrate the official Start of Operations at our Sila Moses Lake plant. This puts us on track for commercial production by the end of the year and is a major milestone in the advancement of a robust U.S. battery supply chain.

Join us for this special occasion as we mark a pivotal moment for our company, partners, community, and industry. The ceremony will be followed by a plant tour and a reception.

**Sila proudly advances U.S. energy dominance
and a domestic battery supply chain.**
