Subject: CBS National News Request // EWG Report

Good morning,

My name is Caroline West and I'm a producer for ***CBS National News/CBS This Morning***.

I'm reaching out to see if the EPA has a response to the Environmental Working Group's report that found glyphosate in oat cereals and other oat products marketed to children, at levels higher than what EWG scientists consider protective of children's health.

Full report here: <https://www.ewg.org/childrenshealth/glyphosateincereal/#.W3P9Ss5KINH>

EWA also suggests that the EPA's limits on glyphosate in foods are too low – Is there a response to this?

Any statement/additional information you can provide is greatly appreciated. This particular report will air this morning at 7:40 AM ET.

Thank you,
Caroline
