HOMOGENEOUS LEAD LINED EQUIPMENT

"United" Products

We also manufacture a complete line of Chemical Lead Lined Pipe, Fittings, Valves, Coils, Tank Connections, as well as **HARDLEAD** Acid Pumps, Fittings, Valves and Cocks.

PERFECT BONDING—this is the reason why so many plant managers are finding the solution to their "acid-handling headaches" by adopting homogeneous lead lined or lead covered equipment. In both types of equipment the union between the lead and the other metal is so perfect that the two are inseparable under vacuum, pressure and temperature variations up to within a few degrees of the melting point of the lead itself.

Add to this unusual feature, the well-known corrosion resistance of pure chemical lead and you will see why we say "Save trouble by using this equipment."

We invite consultation on any equipment of this nature. The wide experience of our engineering staff is at your disposal without cost or obligation on your part. Simply address Technical Department B.
