Subject: Two-stage R-12 compressor unit
Our original order C-50471

Dear Mr. Churns:

In response to our phone conversation of yesterday regarding the subject unit, I would like to offer the following information. The net price addition, FOB factory Milwaukee to Conoco, is \$1,450.00 for providing one Vilter standard intercooler for the two stage compressor which includes Vilter standard insulation, thermal expansion valve and explosion proof liquid solenoid valve.

Regarding the pump type oil recovery system, we now have a smaller model than what was originally quoted in my letter to you of March 15th and the net addition for this system is \$1,500.00. It is basically similar to the information sent to you previously except in a smaller size.

Yours very truly,

VILTER MANUFACTURING CORPORATION
