

April 8, 1969

Dr. M. E. Scoville
Consulting Engineer
General Electric Company
John Street
Hudson Falls, New York 12839

Dear Dr. Scoville:

In reply to your letter of March 19, enclosed are two copies of the original San Francisco Chronicle article concerning polychlorinated biphenyls. I see no reason why you should not send this to your contacts in Europe.

Several of us are going to Great Britain, Sweden and the Netherlands the end of this month to talk with the various people who have published on the subject of PCB's in wildlife tissues. I would be interested in anything you could tell me about any work that is underway on fish and mice. We have recently undertaken quite an extensive research program on our own and it would be of interest to learn what others may be doing.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health
