PLAINTIFF'S
EXHIBIT
DUP-1435

TO: FICR

FROM: THOMAS J. NELSON – 2205 Brandywine Bldg. – Ext. 3036

Doesn't look very good
- cannot discriminate between
asbestos, fibrous and other
particles which might be
fibrous in nature (eg. a
block 8 glasses of H2O). For
the amount of shredding done at any
one site, the cost of proving
its system not statistically
(even if you could live with a
finding in fiber count) would be
prohibitive.
