New Equipment

(Continued from page 124)

ing a definite amount of oil into lubricating cylinder. Then, at high-pressure period, assembly is forced to other end of the stroke, discharging oil to oil-distribution system.

Bijur Lubricating Corp, Long Island City, N. Y.

Single-Drum Hoist

CLASS L-111 reversible Pistonair hoist is designed for both surface and underground operation, and is fitted with Lubri-seal ball bearings. Comes with large drums and 4-cyl reciprocating air motor.

Furnished with either positive or friction-type clutch and is available fully enclosed for protection against dust and dirt.

Sullivan Machinery Co, Michigan City, Ind.

Test Lamp

SG-100 test lamp requires no fuses for safety, has only one test lead, two parts to handle, and is easily replaced. Can be used on ac or dc circuits from 110 to 600 volts, and is equipped with resistor which limits current to such low value that there is no tripping of relays when checking control panels. Large test prod holder contains a 500-ohm, 20-watt resistor of Nichrome wire wound on vitreous enamel core, and unit also includes lamp socket, filament lamp, and magnifying bulls-eye. Lamp socket is wired above resistor, with single test lead wired to side of lamp socket. Resistor and lamp filament are wired in series between test prods, eliminating shorting of resistor.

The Sittler Co, 1133 West Van Buren St, Chicago, Ill.

Odor Adsorber

IMPROVED portable model of adsorber uses principle of ordinary gas mask, that is, positive extraction principle of air-odor removal. Unit uses adsorption medium composed of granular coconut-shell carbon. Has one moving part—the electric
