SUBJECT

4th Qtr. '83 Inspection

REFERENCE

TO : Attached Distribution

The 4th Quarter Competitive Safety and Housekeeping Inspection is currently scheduled for the period of January 9-20, 1984. Areas will be notified a day or so in advance for a specific inspection time to allow scheduling of guides.

Special emphasis areas have been identified for this inspection from PMSB, SHAC, and Annual Inspection Team recommendations. They include:

- Control of critical alarms.
- N<sub>2</sub> hose stations - "P" Bulletin compliance.
- Utility hose inspection - are they conducted properly?
- Use of valve stem protectors.
- Safety chains on chain operated valves.
- Condition of pipe rack ID signs.
- Safety equipment inspections - first person responsibility, especially in service groups and crafts.
- Assignment of Wardens and assembly areas - up to date?
- Scaffolds that don't meet plant standards and storage of scaffold materials.

If you have questions concerning this inspection, feel free to call Bill Howe at Ext. 3276 or other SHAC Committee members.
