COUNTY OF ERIE
HEALTH DEPARTMENT
AIR POLLUTION CONTROL
134 WEST EAGLE STREET
BUFFALO Y. 14202

WILLIAM E. MOSHER, M. D.
COMMISSIONER

January 17, 1969

Mr. Ron J. Anderson
410 Parsons Drive
Syracuse, New York (9)

Dear Mr. Anderson:

Recently, the Hudson Plastering Company here in Buffalo, applied your product, Mono-Cote, for fire proofing purposes to "The Main Place Mall". In applying the product (which was blown and mixed (simultaneously) quite a quantity of it managed to escape to the atmosphere. Naturally, this brought about numerous complaints to our Department.

We request that your Company send us a sheet giving an analysis of your product, simply stating the contents, and percentage of each. We have a sample of your product and can analyze it; but it would be more expedient if you would send us this information. Our purpose for this analysis is to determine if there are any particulates detrimental to health when inhaled by persons nearby when application of product is in progress. If so, we can advise contractors to set up barricades to help contain any particulate and reduce any hazard.

Your attention in this matter is appreciated.

Yours truly,

Philip Morgante
Philip Morgante
Air Pollution Inspector
