REMARKS

All goes well. Quite busy. Asbestos use will be off a bit as they've been able to again reduce amount. Had many questions about our prenet labor situation and of course is worried about a strike. Also he had many quaections about the health aspects and OSHA genzral items. I mentinned the recent more positive literature that has been coming in and he asked if we were circulating such items to the government people who make all those damn foal regulations.
