

Internal Correspondence

Date: February 18, 1987
To: All Customer Service Managers
Copy: See Below
From: L. Podd - Axle & Brake Division Headquarters-Galesburg
Subject: CURRENT STATUS - BRAKE LINING RECOGNIZED BY EATON BRAKE ENGINEERING

CC: D. Bitely	G. Hach
J. Clark	R. Hobbie
J. Flack	D. Jones
T. Furdek	R. Young

Attached please note the current lining Eaton Brake Engineering recognizes as serviceable. Asbestos lining, although in some cases is still available, will become obsolete during the third quarter of 1987. At that time non-asbestos lining will become the single source lining available to the end user.

As we receive more information regarding standardization and lining mix at the various OEM's, we will keep you posted. Please review this material and pass it along to your field personnel.
