Dear Dr. Kehoe:

I wish to thank you very much for your response to my teacher's letter. The information proved to be most helpful.

Through the help of an experienced neighbor, who has dealt with this material once before, and Miss Clarke, I have decided to go through with my original plans. That is, using a tested amount of EDTA and lead, I plan to see what the results, of the lead, will be after a short period of time.

I have enclosed the booklet that you were so kind to send me.

Sincerely,

Cass Peterson
