

FILE NAME: Colonial Sugar Refinery (CSR)

DATE: 1950 Feb 6

DOC#: CSR153

DOCUMENT DESCRIPTION: Govt Letter RE Conditions at Wittenoom
Gorge

District Inspector of Mines (Mr. Boyland),
QUE.

On the occasion of his visit to Wittenoom Camp in September last, Inspector Hunter reported bad conditions in the mill on the Australian Blue Asbestos mine.

This was referred to Inspector Adams in a letter dated 14th November.

His reply states that he had discussed the matter with you and that Inspector Hunter had been instructed to press for improvement of the conditions.

A letter has since been received from the Department of Health in which reference is made to the danger to health that exists in this plant.

The question of appointing a ventilation officer under the provisions of Regulation 153 has also been raised.

Would you please give this matter your early attention.
