STRATEGY ROUTINE X REQUESTED

1) LOCATION: PROCESS NO. 35P  
UNIT NAME BLDG./ZONE  
ROOM/LEVEL

2) PERSONNEL: NAME M F  
SS NO.  
DEPT.

P.P.E. Y N TYPE  
TOBACCO: Y N TYPE

3) SAMPLING DATA: SAMPLE NO. E-8623  
TYPE: BZ P O A S  
METHOD: CT MI FC G DT DRI  
OT TIME STROKE COUNT  
START 16:40  
STOP 21:00  
TOTAL 260  
VOL 243,620

UNIT: CC L CP  
PUMP NO. Bendix CALIB. 937 cc/min.

COMMENTS (USE BACK IF NEEDED)

Sample taken  
in 35P. Chunk of asbestos  
insulation fell off of a line  
above mezzanine. P. traced  
chunks lying near telephone  
@ top of steps and on ground

floor. Area where it was lying was barricaded. R. Pitolo called & requested my opinion on what to do. Told Harley Wince (foreman) to have it cleaned up. Set up area sample to determine conc. of asbestos fibers in the area that were due to exposed asbestos. Typically our monitoring only occurs while asbestos removal is going on. The pump was turned off when cleanup began. This should give good indication of problems due to undisturbed exposed asbestos. Sample was taken from on the top of drum scales near R-18 Drumming Station where an operator was drumming.
