Eden Avenue  
Cincinnati 19, Ohio

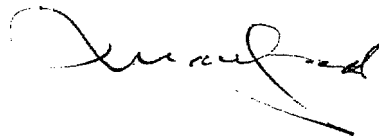

Dear Bob:

Referring to the subject of my letter to you of May 23, herewith are photostatic copies of a couple of Clayton and Lambert folders picked up by one of our men at a plumbing convention the other day.

One of our chemist friends has figured that one of these torches going full blast would produce 50 milligrams of lead per cubic meter.

I hope I may hear from you on this before long.

Sincerely,

MB:JG
